CONTENTS

PART 1—JANUARY 1951

PAGE

Arterio-venous anastomoses in the human stomach. By T. E. Barlow . 1

Nephric development in the sheep with reference to the problem of the ruminant pronephros. By J. Davies 6

A comparative study of the vascularization of the adrenal gland in the rabbit, rat and cat. By R. G. Harrison 12

The post-natal development of the inferior dental nerve of the cat. By A. Mohiuddin 24

The development of joints concerned with early jaw movements in the sheep. By J. H. Scott 36

The histology of the human foetal and prepubertal prostates. By G. S. Andrews 44

The maximum torques developed in pronation and supination of the right hand. By H. D. Darcus 55

Observations on the innervation of the cornea. By E. Zander and G. Weddell 68

Anatomical note: A rare anomaly of m. flexor digitorum sublimis. By Dhirendranath S. Chowdhary 100

Reviews 102

PART 2—APRIL 1951

The nervous component of the atrioventricular bundle. By E. J. Field . 105

The structure and function of the choroidal gland of teleostean fish. By C. H. Barnett 113

The local action of calciferol and oestradiol on bone. By N. A. Barnicot . 120

Observations on the structure and properties of the plantar calcaneo-navicular ligament in man. By R. H. Hardy 135

Alkaline phosphatase in the large intestine. By B. F. Martin 140

Postnatal changes in the lobulation and connective tissue of the pancreas. By John L. Emery 159

Comparative anatomy of the superficial vessels of the mammalian kidney demonstrated by plastic (vinyl acetate) injections and corrosion. By David Kazzaz and William M. Shanklin 163

The early prenatal development of the human knee joint. By Ronan O'Rahilly 166

The behaviour of nuclear structures during depletion and restoration of Nissl material in motor neurons. By Murray L. Barr and Ewart G. Bertram 171

The fifth International Anatomical Congress, 1950: organization and logistics. By D. C. Sinclair 182

Reviews 213

Obituary Note 214

PART 3—JULY 1951

PAGE

The glands of the mucous membrane of the goat abomasum. By K. J. Hill 215
Further studies of the metacarpo-phalangeal and interphalangeal joints of the thumb. By J. Joseph 221
The sesamoid bones of the hand and the time of fusion of the epiphyses of the thumb. By J. Joseph 230
The fragility of non-myelinated nerve terminals. By G. Weddell and E. Zander 242
The extensor apparatus of the finger. By R. Wheeler Haines . . . 251
Observations on the pre-natal development of the intervertebral disc in man. By A. Peacock 260
An experimental study of the visual pathways in a snake (*Natrix natrix*). By J. A. Armstrong 275
Anatomical note: A juvenile skull exhibiting duplication of the optic canals and subdivision of the superior orbital fissure. By R. Warwick . . 289
In Memoriam: G. D. Channell 292
Alexander Low 293
Professor L. R. Shore 296
Reviews 298

PART 4—OCTOBER 1951

Activation and diffusion as factors influencing the reliability of the histochemical method for alkaline phosphatase. By Elizabeth H. Leduc and Edward W. Dempsey 305
Cyclical changes in the uterine mucosa and vagina of the goat. By W. J. Hamilton and R. J. Harrison 316
The proportion of ovarian follicles in different stages of development in rats and monkeys. By S. H. Green, A. M. Mandl and S. Zuckerman. . 325
The factors governing the opening of the eyes in the albino rat. By J. T. Eayrs 330
The development of the human triceps surae. Observations on the ontogenetic formation of muscle architecture and skeletal attachments. By K. W. Jager and J. Moll 338
The effect of thyroid deficiency induced by methyl thiouracil on the maturation of the central nervous system. By J. T. Eayrs and S. H. Taylor 350
Nervous pathways in the developing human labyrinth. By C. C. D. Shute 359
Aplasia of the male prepuce with evidence of hereditary transmission. By Theodore James. 370
Quantitative aspects of the growth of the human ovum and follicle. By S. H. Green and S. Zuckerman 373
Reinnervation of striated muscle after acute ischaemia. By D. B. Allbrook and J. T. Aitken. 376
The relationship of bile alkaline phosphatase to histochemically detectable alkaline phosphatase in the biliary tract; including reference to the histology of the gall bladder epithelium. By F. Jacoby and B. F. Martin 391
In Memoriam: E. J. R. Evatt 401
Reviews 403
Obituary Note 407
Proceedings, 1950–1 408
